edu_bachelors	Bachelor's degree or higher	80%
exp_2yr	2+ years total work experience	85%
projects_2	2 or more projects on CV	70%

Rules Failed — Areas to Improve

Rule	Description	Weight
python_2yr	Python with 2+ years experience	90%
git	Git version control	90%
cloud	Cloud platform (AWS / GCP / Azure)	50%

Personalised Improvement Tips

Based on your evaluation, here are targeted recommendations to strengthen your profile:

1. Add cloud experience: try AWS Free Tier for deploying a small application.
2. Add Git and GitHub to your CV — version control is required for every software role.
3. Learn Python — it is the most in-demand language for software engineering roles.
4. Add Python projects to your portfolio, even small scripts or automation tools count.
5. Learn Git branching strategies: feature branches, pull requests, and code reviews.

Extracted CV Summary

Education	Masters
Experience	5.0 years
Skills	css, docker, html, java, javascript, linux, mongodb, nodejs, react, restapi, sql
Projects	3 detected
